AWARDS

TechCrunch Hackathon Paris 2018 - Finalist

Real Time Laptop Recognition Android App integrating Leboncoin API

Cyber Security Challenge, Regensburg-Champion

Capture the flag competition from #Fiction2Science by Continental AG

Github Profile Analyzer	SeeFood Realtime	Mensa Leipzig	Automated Slides Generator
Github API React.js D3.js	Java Android TensorFlow	Java Android NFC	Java Maven JUnit Scrum
Show the language strength of the user by simply giving their Github ID. It will then go through all their repositories.	Identify whether the scanned image is a hot dog or not a hot dog in real time by using deep learning.	Display the balance of the student card of Uni Leipzig by using NFC.	Scrap Wikipedia & summarize it via NLP and output it in Powerpoint slides. 6 team members from my uni.
